

VAISHALI JADHAV

Senior Database Administrator | Microsoft SQL Server | Cloud & High Availability

Alpharetta, GA | vaicareerpath@gmail.com | +1-678-823-0222

[LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Database Administrator with 10+ years administering Microsoft SQL Server across high-availability, security-sensitive environments. Hands-on across backup/restore policies, performance monitoring and tuning, replication, Always On availability groups, capacity planning, and full version migrations, with the SSIS/SSRS/SSAS stack. Currently modernizing database estates to the cloud (AWS / Azure) with security and cost as first priorities. Trusted with confidential government data, strong at documenting and presenting processes, and effective working both independently and alongside architects and senior DBAs to deliver reliable, cost-effective data platforms.

CORE TECHNICAL SKILLS

Database Administration: Microsoft SQL Server (through 2019), backup & restore (daily incremental / weekly full), performance monitoring & tuning, query optimization & indexing, deadlock resolution, replication, Always On availability groups, failover clustering, high availability / disaster recovery, capacity planning & space management, instance installation / configuration / patching

Migrations & BI Stack: SQL Server version migrations (legacy → 2016 / 2019), SSIS (Integration Services), SSRS (Reporting Services), SSAS (Analysis Services), data archiving processes

Cloud & Infrastructure: AWS (RDS, S3), Azure (SQL Server, App Service), cloud database modernization, Terraform (Infrastructure-as-Code), VMware / Hyper-V virtual machine provisioning (with architecture team)

Security & Compliance: database encryption, PII-access auditing & alerting, TLS hardening, secure handling of confidential / sensitive government data, automated compliance checks

Development & Integration: T-SQL, C# / .NET, ASP.NET, Web Services, REST APIs, relational database integration

Process & Delivery: SDLC, source / change control, Agile / Scrum, Azure DevOps, documentation & stakeholder presentation, extended-hours production support

PROFESSIONAL EXPERIENCE

Georgia Department of Driver Services (DDS)

Conyers, GA | 2013 – Present

Senior Database Administrator / Technical Lead

- **SQL Server administration** – Administer 6 Microsoft SQL Server instances (two failover-clustered) across production and non-production environments, owning backup/restore policies (daily incremental, weekly full), replication, and capacity and space management, with extended-hours support for critical systems.
- **Performance tuning** – Diagnosed and resolved a recurring deadlock that was throttling database processing, cutting processing time by 50%; optimized a high-cost query through targeted indexing and a query rewrite, reducing its execution time by 30%.
- **High availability (Always On)** – Configured Always On availability groups on clustered SQL Server instances to deliver high availability and enable seamless, low-downtime database migrations.
- **Disaster recovery** – Initiated the organization's disaster recovery process and am partnering with the Security and Infrastructure teams to define a cloud disaster recovery standard for DDS.
- **Version migrations** – Led successful migrations of SQL Server databases from legacy versions to SQL Server 2019, including instance installation, configuration, and patching.
- **PII-access auditing solution** – Conceived and built an in-house solution that audits access to sensitive PII data and triggers automated email alerts on access — proposed among senior DBAs and executed end-to-end, eliminating a planned commercial-tool purchase and saving the organization cost.

- **BI & integration (SSIS / SSRS / SSAS)** – Built and maintained Integration, Reporting, and Analysis Services solutions for enterprise data movement, reporting, and analysis.
- **Data archiving** – Established a data-archiving process that improved database performance and overall productivity while controlling storage growth.
- **Cloud database modernization** – Leading ongoing modernization of database workloads to the cloud (AWS / Azure) with security and cost optimization as primary objectives; reduced cloud spend by 64% via Terraform automation that powers down idle resources off-hours.
- **Virtualization** – Collaborated with the senior architect to provision and configure VMware / Hyper-V virtual machines supporting database and application servers.
- **Security & encryption** – Implemented database encryption to protect sensitive data, plus a subscription-wide TLS 1.2 minimum policy with automated compliance checks and remediation of non-conforming applications.
- **Collaboration & documentation** – Partnered across Security, Infrastructure, and management teams; documented and presented database processes, decisions, and runbooks for both technical and business audiences and audits.

Vertex Software / NTT Data

Pune, India | 2006 – 2009

Project Lead

- **Application delivery** – Led enhancements to the Atlas advertising product on a Microsoft technology stack with relational database back ends, improving functionality and reliability.
- **Global delivery model** – Initiated and ran a “Follow the Sun” delivery model, championing Agile adoption and training international (Japan) stakeholders for seamless 24-hour handoffs.

EARLIER EXPERIENCE

- Featherstone Informatics — Analyst Programmer, Pune, India (2003 – 2006)
- Cowles Technology — Analyst Programmer, Milton Keynes, UK (2001 – 2002)
- Kainos Technology — Software Engineer, Belfast, UK (2000 – 2001)
- Corcomp Infosys — Programmer Analyst, Mumbai, India (1998 – 2000)

RECOGNITION & AWARDS

- Excalibur Award — high-impact modernization project delivery
- IT Star Award — system transformation leadership
- Commendation — process modernization across service centers
- Best Employee Award (twice) — quality of work and team collaboration

CERTIFICATIONS & EDUCATION

- AWS Cloud Development & SysOps
- Microsoft Azure Fundamentals (Virtual Training Day); Azure AI Hackathon
- Google AI Essentials Certification
- Postgraduate, Computer Science — S.N.D.T. University, Mumbai
- Graduate Diploma — N.I.I.T., Mumbai | Bachelor of Commerce — M.C.C., Mumbai
